

4T2™ Content-Analyser

fields of use

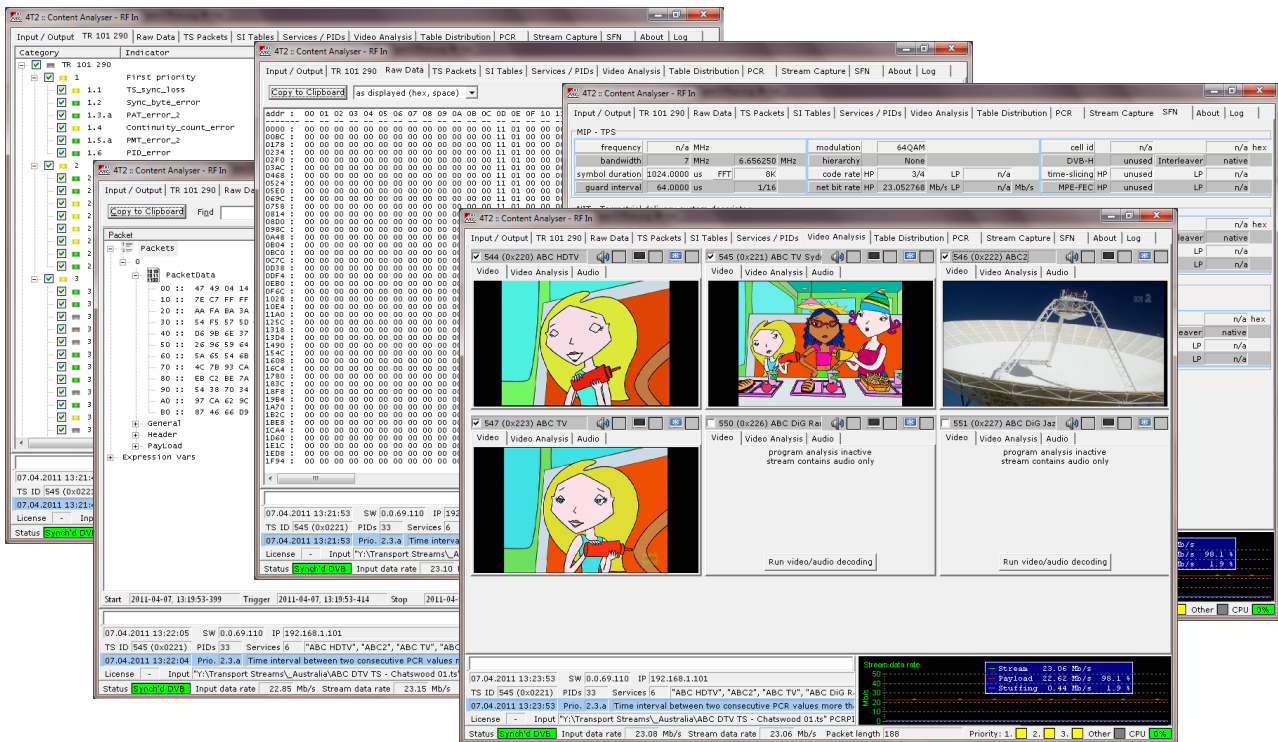

- Analysis of MPEG-2 transport stream data
- Broadcast RF, and ASI monitoring
- IP monitoring
- Manufacturing
- R&D
- Trouble-shooting

benefits

- ISO MPEG, DVB-T, and ATSC supported
- RawData, and Packet expert functions
- TR.101.290 error checking
- SI-tables hierachical view
- Data-rate visualisation
- SNMP remote control, following the DVB-MIB
- Content decoding with black/freeze, and audio mute detection
- Measurement of PCR Program Clock Reference jitter
- Multi-Viewer function (MPEG 2/4 SD, HD)
- One application to support ABC XTASI, UDP, RTP, files, or BDA RF-receiver sources
- Windows® 64bit support

The 4T2™ Content-Analyser application is a windows program to validate MPEG Transport Stream data in real-time.

Designed for monitoring applications, the software offers additional expert functions for raw-data, packet triggering, or terrestrial SFNs that make it the ideal choice for R&D, or trouble-shooting.

4T2™ Content-Analyser is pre-installed on 4T2™ Portable, or 4T2™ Rack systems.

It can be used stand-alone, or with the ABC XTASI products.
